Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a process for producing a fabric material, classified in class 26, subclass 29R.
 - II. Claims 12-28, drawn to a fabric material, classified in class 442, subclass 181.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). With regard to product claims 12-24 in relation to process claims 1-11, the product can be made by another and materially different process, such as a process in which the second pick yarn is napped and sheared before being woven into a fabric with the first pick yarn. With regard to product claims 25-28 in relation to process claims 1-11, the process as claimed can be used to make a different product, i.e. a fabric which does not have a visible pattern formed by the second pick yarn.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3765

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
